In his essay "The Talk," Evans writes about the conversation that black parents have with their children about how to stay safe in a racist world.

Evans's own father gave him this talk when he was 10 years old. Evans remembers being terrified after the talk, but he also remembers being grateful for his father's wisdom. Evans writes, "The Talk is a reminder that being black in America means always being aware of your surroundings, always being on guard. It's a reminder that you are never truly safe."

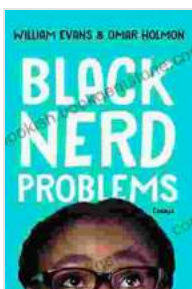

In his essay "The Black Nerd," Evans writes about the challenges of being a black nerd in a white world. Evans writes, "Black nerds are often seen as outsiders, as people who don't belong. We're not black enough for the black kids, and we're not white enough for the white kids." Evans also writes about the pressure that black nerds feel to succeed. He writes,

"Black nerds are expected to be the best and the brightest. We're expected to be the ones who break down barriers and change the world. But what happens when we don't live up to those expectations?"

Evans's essays are not just about the challenges of being black in America. They are also about the power of hope and resilience. In his essay "The Future of Blackness," Evans writes, "The future of blackness is bright. It's a future where black people are free to be themselves, where they are celebrated for their culture and their contributions to society. It's a future where black people are no longer afraid to be who they are."

William Evans is a brilliant writer whose essays are a powerful exploration of race, class, and masculinity. His essays are often heartbreaking, but they are also full of hope and insight. Evans's essays are a must-read for anyone who wants to understand the complexities of the black experience in America.
