The story begins with a team of scientists at the SETI Institute who are working on a project to search for extraterrestrial life. One day, they receive a signal from a distant planet that appears to be artificial. The team is excited by the possibility that they have finally made contact with an alien civilization, and they decide to launch a mission to investigate the planet.

The mission is led by Dr. Elizabeth Jensen, a brilliant scientist who is determined to find out the truth about the signal. She is joined by a team of

experts in various fields, including astrophysics, biology, and engineering. The team sets off on a journey that will take them to the far reaches of the galaxy.

As the team gets closer to the planet, they begin to realize that the signal is not what it seems. There is something strange and dangerous about it, and it is beginning to affect the team members. One by one, the team members start to die, and Elizabeth realizes that she must find a way to stop the signal before it kills them all.

The Exodus is a fast-paced, suspenseful thriller that will keep you on the edge of your seat from beginning to end. Elizabeth Jensen is a strong and determined protagonist, and the supporting cast of characters is equally well-developed. The story is full of twists and turns, and the ending is sure to leave you satisfied.

What Makes The Exodus a Hard Science Fiction Thriller?

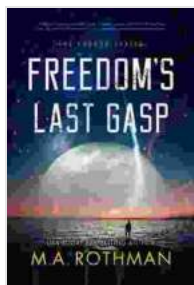

The Exodus is a hard science fiction thriller because it is based on real science. The story is plausible, and the technology that is used is based on existing research.
